#### **Enhanced Feedback Opportunities**

For the second year, we provided platforms for detailed feedback through our DEI survey. This year's survey included demographic insights and in-depth qualitative responses, revealing key themes around leadership diversity, transparency, and communication.

#### **Increased Representation Data**

Our 2024 survey showed improvements in several areas:

- Representation of employees and athletes identifying as non-white in 2024 was 8.02% (down from almost 10% in 2023). Our athlete representation has maintained level at nearly 10% (9.63%).
- Gender diversity at athlete and staff level remains balanced, with a near 50/50 split between female and male members.

Despite progress, our data indicates ongoing underrepresentation in leadership roles and coaching staff for females, disabled people and ethnic diversity. These insights will inform our action plan development for 2025.
